

Our Team

The first people you will encounter are our friendly receptionists who will make sure that you are warmly welcomed and if you have a dental emergency, will do their utmost to get you in for treatment as quickly as possible.

Principal Dentist Graham Culy has more than 30 years' experience in dentistry plus a diploma in Acupuncture. Graham specialises in CEREC restorations, dental implants and cosmetic dentistry.

Ron Patel graduated from London's prestigious Guy's King's and St Thomas Dental School. Ron has particular expertise in Endodontics (root canal therapy), implants, cosmetic dentistry and orthodontics. He is also a licensed Invisalign and Inman Aligner practitioner.

Ron and Graham are both Dental Phobia certified. Their gentle approach enables them to successfully treat many people with dental anxieties or dental phobias.

Our experience dental nurses, therapists and hygienists are absolutely fantastic and are totally focused on your comfort and care.

East Melbourne Dental Group

Real smiles for real people.

With a gentle approach, and high quality, long lasting dental care we like to change people's perceptions of dentistry.

East Melbourne Dental Group was established with the mission to enable people to achieve optimal dental health in a genuinely caring way. We are passionate about providing treatments that achieve long term solutions, rather than short term fixes, while being ever mindful of patients' overall health and well-being.

We are a people-focused practice, both in the way we deliver dental care and the staff we employ. Our relationships with our patients drive everything we do, from the cutting edge dentistry we practice to the hot towels, heat packs and neck cushions we provide – all designed to ensure that each visit is memorable, for all the right reasons.

We believe that your dental health is integral to your total health and wellness, and that prevention is always better than cure. Whether you seek cosmetic, general, and emergency dentistry, or a second opinion, the team at East Melbourne Dental Group will deliver the care and expertise you need.

- > Use the finest and most advanced dental techniques.
- > Inform you so you are empowered to make choices about your treatment options.
- > Use biocompatible materials.
- > Remember that your teeth are an integral part of your total health and wellness.

Latest Technology

CEREC

CEREC technology uses biocompatible porcelain to create extremely precise tooth restorations. CEREC porcelain restorations are made on site, in one visit.

Laser Dentistry

Procedures using laser dentistry can be done in one visit with less than usual, or nil anaesthetic being required.

Panoramic Dental X-Rays

This impressive machine allows us to take a complete mouth and jaw X-ray on the spot. It delivers less than 90% of the X-ray dose compared to traditional film.

Intra-Oral Camera

We use the intra oral camera in your mouth while you watch on screen what the camera is filming. It's a great tool for discussing dental issues and treatments.

Wand Anaesthetic System

The wand system enables us to deliver anaesthetic without the need for a conventional needle injection.
